(application filed on or after May 29, 2000)

The patent term adjustment to date is 0 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 0 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Response to Amendment

The following is in response to the amendment filed on February 28, 2003.

Claims 1-159 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose a woven tissue-making fabric made from cross-direction strand and machine direction strands, and having elevated floats and depressed sinkers, whereby at a transition region a first elevated float in a first background region becomes a second depressed sinker in a second background region and a first depressed sinker in the first background region become a second elevated float in the second background region, and whereby the elevated floats and depressed sinkers run parallel in an alternating fashion so that the floats are positioned between adjacent sinkers and the sinkers are positioned between adjacent floats. Similarly, the prior art does not disclose a fabric as described above except whereby at a transition region a first elevated float in a first background region becomes a second elevated float in a second background region and a first depressed sinker in the first background region becomes a second depressed sinker in the second background region. The prior art does not disclose such weave patterns.

The prior art also does not disclose a method of making a tissue product by depositing papermaking fibers onto a woven fabric having elevated floats and depressed sinkers, whereby at a transition region in the fabric, a first elevated float in a first background region becomes a second depressed sinker in a second background region and a first depressed sinker in the first

Art Unit: 1731

background region become a second elevated float in the second background region, and whereby the elevated floats and depressed sinkers run parallel in an alternating fashion so that the floats are positioned between adjacent sinkers and the sinkers are positioned between adjacent floats. Similarly, the prior art does not disclose a method of making a tissue product as described above except whereby at a transition region a first elevated float in a first background region becomes a second elevated float in a second background region and a first depressed sinker in the first background region becomes a second depressed sinker in the second background region. The prior art does not disclose methods of making tissue with fabrics having such weave patterns.

The prior art also does not disclose or suggest a tissue product made using the claimed fabric. The claimed fabric imparts a surface structure and texture that distinguishes the claimed tissue from prior art tissues, while also providing a tissue with uniform density instead of a tissue with alternating compacted regions and low density regions.

Prior art fabrics for making tissue webs have different structures, and may comprise a base fabric with a textured pattern woven therein (Chiu, US 5,429,686), or comprise weave patterns that provide for three-dimensional pockets (Quigley et al., US 5,520,225), or comprise weave patterns having elevated knuckles at the surface (Kaufman et al., US 5,832,692), or comprise long floats and textured patterns without using additional yarns (Hay et al, US 6,237,644), or comprise resinous structures elevated from the surface of a base fabric (Trokhan, various patents). These prior art fabrics result is tissue papers with different structures than that of the present invention.

Response to Arguments

Applicant's arguments have overcome the rejection of claims 31-61 and 111-159 under USC 112, first paragraph presented in the previous office action. Applicant has clearly pointed out subject matter in the specification and in the drawings that support the second embodiment given by these claims. The Examiner thanks the Applicant for clarifying this subject matter.

Applicant's arguments have also overcome the rejection of claims 11, 30, 41, 61, 79, 103, 128, and 152 under USC 112, second paragraph presented in the previous office action. The Applicant has provided sufficient supporting evidence for the definitions of the terms "filled" and "non-macroscopically monoplanar" as used in the claims.

Drawings

The proposed drawing corrections and the proposed substitute sheets of drawings, filed on February 28, 2003, have been approved.

New corrected drawings are required in this application because the faxed copies of the proposed drawings do not clearly show all of the details.

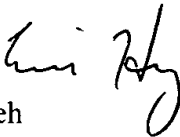

The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Hug whose telephone number is 703 308-1980. The examiner can normally be reached on Monday through Friday, 9:00 AM to 6:00 PM.
